

From LFS Manual

**Autocross** (also known as Test Area), is the area that does not contain closed circuits. Instead, setup testing and free racing on the autocross area or skid pad and drags can be done here. This is a good place to use the Autocross Editor, enabling you to create your own courses on the big open spaces here.

### **Autocross (AU1)**

Length: N/A

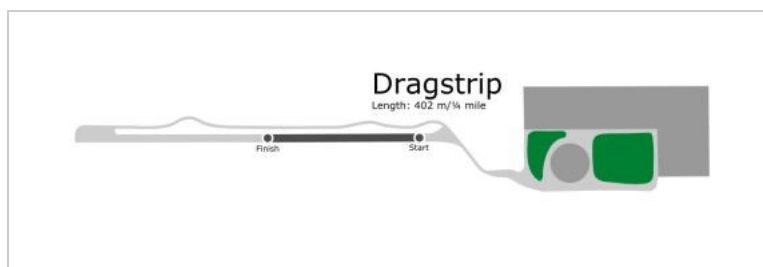

This is the second area exclusively designed for autocross layouts. It is shaped like a very bold "L". Its fun is only limited by your own imagination.

### Skid Pad (AU2)

Length: N/A

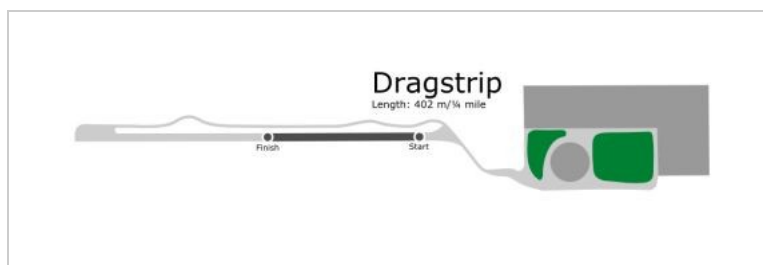

You want to test the grip of your car? Is your setup perfect for cornering? The Skid Pad is the place to test this. Nothing more to do here though. In fact, staying here too long is likely to make you dizzy.

### Drag Strip (AU3)

Length: 0.4 km (0.25 mi)

A 1/4 mile (402 m) long straight, where two players can race head-to-head in a test of throttle control and shifting speed.

### 8 Lane Drag (AU4)

Length: 0.4 km (0.25 mi)

Otherwise identical to the Drag Strip, but because up to eight cars can race here as opposed to two, the lanes are much narrower. Drivers must take extra care not to end up on the opponent's lane.
