From LFS Manual

[Jump to navigation](#)[Jump to search](#)

Tracks are the virtual environments to drive the cars on. Live for Speed offers permanent racing circuits, a semi-permanent city area or open areas suitable for building custom autocross layouts. While most tracks are purely fictional, there is Rockingham, the only real laser-scanned track, available in S3 license.

Each of the 9 tracks are divided by the minimum license level required. The license levels are demo, S1, S2 and S3. The demo version contains the Blackwood track. Other tracks must be unlocked by purchasing a license (<https://www.lfs.net/shop/licenseselect>). After buying a license, you can select reversed track configurations, build custom autocross layouts and use more grid slots.

Demo Tracks

The demo tracks are tracks available to everyone for free. The demo version does not include reversed and open track configurations and it also limits the grid size to 12 drivers on all tracks.
